DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-38, drawn to a system and method of establishing an acceleration of a vehicle, classified in class 701, subclass 1.
 - II. Claims 39-40, drawn to a system and method for controlling a braking mechanism of a towed vehicle, classified in class 303, subclass 123.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product can be used in a materially different process of using that product such as controlling a towed vehicle to prevent jackknifing.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Harold Milton on 5/13/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3683

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
